

El Paso Refinery

Fact Sheet

REFINERY INFORMATION

The El Paso refinery is located approximately three miles east of downtown El Paso, Texas, on approximately 555 acres. The refinery was originally two facilities. The "North" portion was built in 1928, and the "South" portion was built in 1931. The operations of both sites were significantly modernized over the years, and the two plants were combined in 1993.

The El Paso refinery has crude capacity of approximately 131,000 barrels per calendar day (bpcd), with operations including catalytic cracking, alkylation, and reforming. The refinery has marketing terminals and loading racks, with the loading rack having an estimated maximum capacity of 36,000 bpd.

Crude oil is delivered to the refinery via pipeline with access to the majority of the producing fields in the Permian Basin and Northern New Mexico. The refinery also has pipeline access to blendstocks and refined products from the Gulf Coast.

Products are delivered from the El Paso Refinery by truck, rail, and pipeline. There are three product pipelines out of El Paso, delivering to Arizona, Mexico, and New Mexico. The refinery has access to storage capacity of approximately 4.9 million barrels.

ABOUT MARATHON PETROLEUM CORPORATION

Marathon Petroleum Corporation (MPC) is a leading, integrated, downstream energy company headquartered in Findlay, Ohio. The company operates the nation's largest refining system with more than 3 million barrels per day of crude oil capacity across 16 refineries. MPC's marketing system includes branded locations across the United States, including Marathon brand retail outlets. Speedway LLC, an MPC subsidiary, owns and operates retail convenience stores across the United States. MPC also owns the general partner and majority limited partner interests in two midstream companies, MPLX LP and Andeavor Logistics LP, which own and operate gathering, processing, and fractionation assets, as well as crude oil and light product transportation and logistics infrastructure.

FAST FACTS

- El Paso refinery full-time employees: 473
- Crude oil capacity: 131,000 bpcd

ENVIRONMENT

- One of the first refineries in the U.S. to install a wet gas scrubber to reduce PM emissions.
- Installed flare gas recovery system, eliminating continuous waste gas flaring.
- Implemented process advancements to significantly reduce sulphur and benzene in fuels.
- On-site lab certifies finished products to meet all government specifications and regulations.

HEALTH AND SAFETY

- We enforce a disciplined framework that includes comprehensive design, engineering, operating and maintenance practices. We use industry-recognized methodologies to assure process safety and asset integrity, and to reduce the risk of incidents.

COMMUNITY SUPPORT

- Provide \$1.5M in annual community investment funds to non-profit organizations in El Paso and the Permian Basin.
- Provided \$125,000 grant to the American Red Cross to purchase an emergency response vehicle.
- Provided \$50,000 grant to the City of El Paso for public safety.
- Developed partnerships and provided approximately \$375,000 in grants for STEM education programs in multiple schools across the EPISD, YISD and SISD school districts.
- Funded \$375,000 in 2017 for basic community needs for organizations such as food banks, homeless shelters, and Habitat for Humanity.
